Карта № 8  
F (Sm) 347 \*p/ɸ/njɸ

Комментарий

В некоторых слн. (17, 18), чеш. (196), пол. (243–245, 250–251, 254, 259, 262–264, 268–270, 272, 278, 280, 283, 285, 288–292, 294–296, 299–301, 308–309, 313, 319–322, 325) и укр. (171, 427, 448–449, 465–469, 483–484) пп. рефлекс \*ɸ отличается от развития в остальных фонологических контекстах, что объясняется положением перед *n*, *nj*, укр. *n*'.

Рефлексы типа *Vjn*, *Vjnj* в слн. и хорв. пп., а также в пол. п. 319 являются антиципацией палатальности. Возможно дальнейшее развитие *nj* > *j* > *j*, а в пп. 17, 146а, 148а назализованный рефлекс \*ɸ.

Особое развитие получил рефлекс \*ɸ в определенном числе хорв. пп.: *a* > *ɸ*: (пп. 30, 32–33, 65), *a* > *o*: (п. 42), *a* > *ɔ*: (п. 44).
